CARA PENGGUNAAN PROGRAM

Cara instal:

1. copy root folder ini "digilib_akakom" ke directory www atau htdocs

2. ekstrak file core_ci.zip ke directory www atau htdocs

3. buat sebuah database di mysql, misal bernama "db_digilib"

4. buka phpmyadmin, import (jalankan) file "create_tables.sql" ke db yang baru saja dibuat

5. buka file digilib_akakom/index.php

   ubah

   ```
   $system_path = '/home/nandaabi/public_html/core_ci/system';
   ```

   ke

   ```
   $system_path = '../core_ci/system';
   ```

6. buka file digilib_akakom/application/config/config.php

   ubah

   ```
   $config['base_url']        = 'http://digilib.nandaabiz.com/';
   ```

   ke

   ```
   $config['base_url']        = 'http://localhost/digilib_akakom/';
   ```

7. buka file digilib_akakom/application/config/database.php

   ubah

   ```
   $db['default']['username'] = 'nandaabi_digilib';
   $db['default']['password'] = 'd1g1l1b';
   $db['default']['database'] = 'nandaabi_digilib';
   ```

   ke

   ```
   $db['default']['username'] = 'root'; //atau username mysql anda
   $db['default']['password'] = '';     //atau password mysql anda
   $db['default']['database'] = 'db_digilib'; // nama db dari langkah 3
   ```
