

Cara Menjalankan Program Locyoben Pada Command Promp Ubuntu.

What u need to install first is :

1. NodeJs
2. npm
3. ExpressJs
4. MongoDB & Mongoose

After all tools mentioned above are installed, this is the next thing u gonna do :

1. Start MongoDB
2. Using dir locyoben
3. Import some database to mongodb from 'db' directory
4. After entering locYobenLive directory u can go ahead and install some packages by issue these command on your cli `npm install` or `npm install --global`
5. Start the locYoben apps `npm start`
