1. Download terlebih dahulu AppServ 2.5.10 nya disini: http://prdownloads.sourceforge.net/appserv/appserv-win32-2.5.10.exe?download

2. Setelah itu anda jalankan dengan melakukan KLIK 2 KALI pada icon installer-nya.

3. Jika sudah, kemudian akan muncul jendela AppServ 2.5.10 Setup, Klik Next untuk melanjutkan

4. Setelah itu akan muncul jendela License Agreement, Klik "I Agree" untuk melanjutkan

AppServ 2.5.	0 Setup		
<b>1</b>	License Agree Please review t	ement he license terms before instal	ling AppServ 2.5.10.
Press Page Down	to see the rest of the agre	ement.

7. Sekarang kita akan mengisi kotak inputan "Server Name", "Administrator's Email Address", Dan "Apache HTTP Port". Isilah dengan spesifikasi berikut:

- Server Name = localhost
- Administrator's Email Address = webmaster@localhost
- Apache HTTP Port = 80

	Apache HTTP Server Information Please enter your server's information.	
Server Name (e	.g. www.appservnetwork.com)	
localhost		
Administrator's	Email Address (e.g. webmaster@gmail.com)	
webmaster@k	icahost	
80	A LECTOR TONY	
nft Install System	v2.18	

8. Setelah itu, akan muncul jendela MySQL Server Configuration. Pada kotak inputan Enter Root Password & Re-Enter Root Password kita isi dengan password sesuka kita (bebas). Saya asumsikan Passwordnya kodok . Lanjut klik Install. \*Dilarang protes :))

AppServ 2.5.10 Setup	
MySQL Server C Configure the MyS	onfiguration SQL Server instance.
Please enter Root password for MySQL Serv	ver,
Enter root password	
Re-enter root password	
•••••

10.Klik "finish", hingga muncul Prompt hitam. Sampai disini, kita telah sukses menginstallasi AppServ dikomputer Windows :D

## Menjalankan AppServ

Untuk mencoba web server lokal yang baru saja kita install, Ikuti langkah berikut.

- Buka Browser anda. (misalnya: Mozilla Firefox)
- Ketikan http://localhost atau http://127.0.0.1 di address bar

11. Copy program php ke dalam c:\xamp\htdocs\

12. Buka aplikasi dengan dari browser dengan mengakses url = <u>http://localhost/slemanform/admin</u> (slemanform/admin) karena nama program php pada folder c:\Appserv\www di berinama slemanform silahkan menyesuaikan nama folder yang anda buat http://localhost/(diikuti nama folder)

Aplikasi sudah dapat dijalankan dan muncul form login
