

**CARA MENJALANKAN PROGRAM
SISTEM INFORMASI PENDAFTARAN PRA SKRIPSIBERBASIS WEB
DI STMIK AKAKOM**

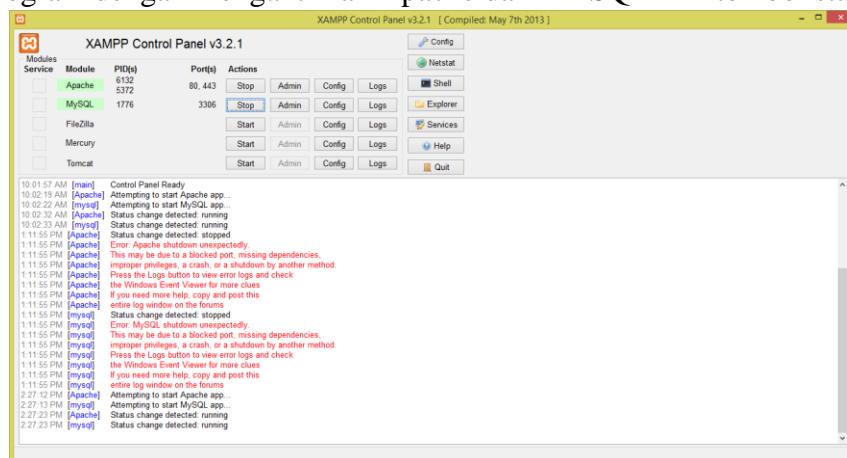

1. Isntall software xampp yang ada didalam folder software pendukung

2. Copy folder praskripsi yang ada didalam folder sourcecode, yang berisi kode program kemudian paste kedalam directory C:\xampp\\htdocs sehingga letaknya berada di C:\xampp\\htdocs\praskripsi.

3. Jalankan program dengan mengaktifkan Apache dan MYSQLI klick tombol start

4. Lalu buka browser dengan mengaktifkan localhost/phpmyadmin/ buat database dengan nama “praskripsi” lalu create

The screenshot shows the phpMyAdmin interface on a local server. The left sidebar lists databases: 'Recent' (empty), 'Favorites' (empty), and a tree view of databases: 'New', 'alatmusik', 'anggota', 'belajar2', 'binerpro3', and 'Praskripsi'. The main area is titled 'Databases' with a 'Create database' button. A dropdown menu for 'Collation' is open, showing 'Praskripsi' as the selected option. Other tabs include 'SQL', 'Status', 'Users', 'Export', 'Import', 'Settings', 'Replication', and 'Variables'.

5. Kemudian ketikan alamat localhost/praskripsi/ di browser untuk menjalankan program pendaftaran pra skripsi di STMIK AKAKOM Berbasis Web Menu Login

6. Tampil sebagai admin

The screenshot shows the homepage of the 'Sistem Informasi Pra Skripsi' for STMIK AKAKOM Yogyakarta. The top navigation bar includes links for 'Home', 'Admin', 'Mahasiswa', 'Dosen', 'Jurusan', 'Kajur', 'Periode', and 'Jadwal'. On the right, there is a link 'Keluar' (Logout). The main content area features the university's logo and the title 'STMIK AKAKOM'. Below it is a section titled 'Sekilas Tentang Informasi Pendaftaran Pra-Skrpsi 2018/2019' with a brief description of the program's purpose and requirements.
